

## VTL partners - Introducing ourselves

### BWG Reimer, Gotha 'Your success. Our aim'

Highly motivated staff, innovative ways of working, the use of cutting edge technology, commercial brains and many years of experience are the key building blocks for our everyday operation as a modern, SME logistics business.

The company was founded as Bremer Warenverteilungs Gesellschaft in Bremen in 1925 by privy councillor Dr. Simon Reimer, the grandfather of the current proprietor, also named Simon Reimer.

Today our company comprises 7 sites throughout Germany and employs around 450 staff. We work in almost every area offered by any haulage and logistics business today. Our emphasis, however, is on contract logistics, national and international transportation, project handling and branded goods logistics.

Our Gotha operation was set up in 1991, at that time with just 3 staff, as BWG Reimer's newest branch operation. Indeed, our start-up then was in a former

freight hall of the Deutsche Reichsbahn (East German Railways).

"Look how we've grown!" could be the title for the history of the development of BWG Reimer in Gotha. Today we employ 35 staff. We manage hall space totalling 6,500 m<sup>2</sup>, including 2,500 m<sup>2</sup> for goods handling, 2,000 m<sup>2</sup> for storage (incl. high rack) and 2,000 m<sup>2</sup> for project services for a pan-European pallet supplier.

Via 'Spedition 2000', we have been a VTL partner for 10 years. We certainly must say that belonging to a nationally very well positioned and internationally ever improving general cargo system such as VTL has enabled us to be more active and successful in acquiring new clients. We for our part stand for a permanently very high standard of quality in the delivery of the incoming consignments. Since January we have been working with a new scanner system and make the status data and the delivery note

with an electronic signature available to our partners online.

In addition to our own premises in Gotha, the city itself, a former ducal capital, and the Federal State of Thuringia with its diverse architectural and natural monuments are well worth paying a visit. You are warmly invited to do so, as you are too to join us in working together.
